October 2, 2000

To Whom it may concern,

Bluestone, Inc. installed a 2 ply 320 mill loose laid and ballasted roofing system on our store and warehouse In the Spring and Summer of 1999. One section is high traffic, another section was a thin membrane Firestone roofing system that was still under warranty, the 3rd section was dead level flat.

To date the roof has been trouble free and we expect that this will continue. We appreciate Mr. Beloin's approach of trying to waterproof our building Instead of selling us a roof. We paid a little more than we had to but we believe that we got a much greater value for our investment.

I personally supervised the installation and I'm impressed with the design. I don't see how this roof will ever leak.

I recommend that you observe his demonstrations. They are very informative.

Very Truly Yours,

Dexter Burrell
President: ADM Tool Service, Inc.
